Shown with Optional Wheel Locks.

- **STRONG CARBON STEEL FIREBOX:** Charcoal burns at 1000° Fahrenheit and places huge thermal stresses on a firebox. Our charcoal fireboxes are manufactured from carbon steel because it is the strongest material that can withstand these extreme temperatures. Stainless steel is not used because it is a "softer" metal and does not have the strength, thermal stability or proven reliability of our carbon steel firebox.
- **DURABLE BLACK POWDER COAT FINISH:** Our black powder coat finish is heat resistant to 1000° Fahrenheit and has been designed specifically for the extreme temperatures generated by charcoal. This high quality, baked powder coat finish is more durable and uniform than paint. It is stronger because powder coat actually forms a chemical bond with the metal making it resistant to heat, scratches, corrosion, UV light and fading.
- **BEST GRILL TOPS IN THE INDUSTRY:** Our easy to clean one-piece grill tops feature a welded steel core for strength and nickel plating for durability. The closely spaced rods run front to back for easy spatula use and are perfect for grilling steaks, chicken, pork, hamburgers, hot dogs, sausage, salmon, and vegetables. Our simple slide action adjustment has 2 grilling heights to accommodate a wide variety of cooking needs. Stay cool handles allow for easy height adjustment - even when the grill is hot!

Model	Description	Weight

The Original Charcoal Grill

The Grills That Set the Standard in Charcoal Grilling

STOCK
ITEMS

M-15B 5' Charcoal Grill and M-251B Rotisserie
Shown with Optional 2-Way Skewer & Wheel Locks

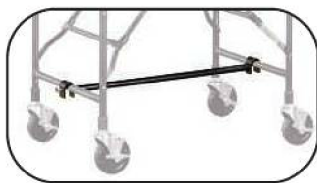

- **QUALITY CONSTRUCTION:** Big John's M-15B is the best selling commercial, outdoor BBQ grill in America. For over 55 years, it has set the standard by which all charcoal grills are judged. Our reinforced steel firebox and tubular screw-in legs are extremely strong, yet lightweight. The M-15B is rugged enough to last a lifetime yet weighs only 144 lbs.
- **EASY ROLLING CASTERS:** Our charcoal grills use high quality, commercial grade casters rated at 200 lbs. each. The 5" x 1.25" rubber wheels have a wide tread that easily rolls over the irregular terrain and hard surfaces found outdoors. Wheel locks (shown below) are available as a recommended accessory.
- **HIGH COOKING CAPACITY:** You can feed everyone at your next party with one of these grills. Big John's 2' x 5' charcoal grills feature 10 square feet of grilling surface and are easy to transport, setup and use.

Charcoal Grill Accessories

5" WHEEL LOCKS

A great safety option to lock your wheels in place.

LEG BRACE

For added strength and security add a leg brace to your folding leg grill.

VINYL COVERS

Protect your investment with our custom fit, tear resistant vinyl covers.

BOOSTER BEADS

Looking for a grill top cleaning solution? Booster Beads are the answer.

Charcoal Grills

The Best Charcoal Grills on the Market

M-15FB 5' Charcoal Grill Package
with Folding Legs and 5" Casters
Includes Leg Brace and Wheel Locks.

FOLDING LEGS PROVIDE QUICK SETUP

Folding legs are designed to setup quickly and are a real time saver for your staff. Our folding leg design also eliminates the nuisance and possible expense of misplacing a leg. These additional supports are why Big John's charcoal grills are extremely strong yet light enough to comfortably move on a daily basis.

M-15B
with Screw-in Legs and 5" Casters
Shown with optional Wheel Locks

M-15AB
with Screw-In Legs, No Casters

1 Folding Legs are welded to the firebox for quick setup and compact storage.

2 Large 5" casters easily roll over rough surfaces or soft terrain.

3 Steel reinforcing channels are welded to the firebox for additional strength and rigidity.

4 Folding legs have dual locks for strength and safety.

Little John Charcoal Grills

Big John Quality in a Compact Size

M-13B 3' Charcoal Grill
with Screw-in Legs and 5" Casters.
Shown with Optional Wheel Locks.

THE ADVANTAGES OF CHARCOAL

- **TRADITIONAL BARBECUE:** Cooking over charcoal produces authentic BBQ. The smoke created by the smoldering coals delicately flavors the meat and entices the crowd with the sight and smell of great barbecue.
- **DISTINCTIVE SMOKE FLAVORS:** Charcoal is produced from flowering hardwoods and each species creates its own unique flavor. Further enhance the flavor of your food by adding our wood pellets mixed in your charcoal.
- **LOW PURCHASE COST:** This is a significant advantage if the grill will be used infrequently. However, if the grill is going to be used often, this savings may be offset by the cost of charcoal fuel.
- **THE RIGHT SIZE FOR YOU:** Our Little John is made just as tough as its big brother from the adjustable grate down to its wheels. The only thing missing are the two feet in the middle. You don't have to be the biggest to be the best.

M-13FB Package
with Folding Legs and 5" Casters
