

# Gas Steam Tables

We Satisfy Your Serving Needs Too

ST-4 4 Bay Steam Table + ST-3 3 Bay Steam Table  
Shown with Optional 30 lb. Tanks

- SUPERIOR PERFORMANCE:** Professional chefs have discovered that our Portable Steam Tables are a better solution to operating reliable and efficient serving lines at outdoor cooking events. Chafing dishes were designed for indoor use and do not perform well in the cold or windy conditions frequently found when cooking outdoors. Our units accept standard food pans and feature a reliable, quiet LP Gas burner that is protected from the wind inside an enclosed base.
- HEAT CONTROL:** Our Steam Tables feature an adjustable control valve and a powerful 28,000 Btu burner that provides for fast start-ups and precise heat control after steam is being generated. Challenging outdoor conditions are no match for the versatility of this unit – you can maintain food temperature and keep those serving lines moving.
- BUILT TOUGH:** Designed and built to provide years of reliable service. These Steam Tables are built to commercial grade standards and feature a strong carbon steel base with a durable powder coated finish rated to 1,000° F. The one-piece water pan is constructed from type 304 stainless steel for easy cleaning.
- CONVENIENT DESIGN:** Our one-piece stainless steel water pan includes a threaded spigot that easily connects to a garden hose for filling and maintaining the water level. The spigot also adds convenience by allowing you to use the left-over hot water during clean up.

Model	Bays	Burners	Dimensions	Weight
ST-4	4	1 x 28,000 Btu	25.0" x 58.5" x 33.0"	133 lbs.
ST-3	3	1 x 28,000 Btu	25.0" x 45.0" x 33.0"	110 lbs.
ST-1	1	1 x 7,000 Btu	25.0" x 16.5" x 15.5"	18 lbs.
